DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over prior art figure 1(a) in view of Zajdman Avigdor Amichai Oded (JP 03-062579)

With respect to claims 1-10, prior art in figure 1(a) shows cylindrical straight slab type gas laser comprising a pair of electrodes (11, 12), a ring shaped trick mirror (M1), an output mirror (M2) and M3 W-axicon mirror. However figure 1 shows a cylindrical straight slab that needs the spacers for properly positioning the two cylindrical electrodes. Whereas Zajdman Avigdor Amichai Aded disclose laser system comprising a waxy cone (18) which can be use to replace for M3 W-axicon and spacers for properly positioning the two cylindrical electrodes, see figure 2. For the benefit of the properly positioning the two cylindrical electrodes without spacers, it would have been obvious to one having ordinary skill in the art at the time the

invention was made to provide prior art figure 1(a) with the waxy cone (18) as taught or suggested by Zajdman Avigdor Amichai oded.

Response to Arguments

2. Applicant's arguments with respect to claims 1-10 have been considered but are moot in view of the new ground(s) of rejection.
